ARENA-ALBUM

Throughout the tour, we have included interactive moments when your photo will be taken. For every speedster who collects at least six of these points, there will be a personal photo album waiting at the end of the tour as a unique souvenir to take home!

FOTO POINT

This symbol always indicates a photo point. Just stop for a moment and take a snapshot. Your photos will be included in your personal album at the end of the route.

## It's as easy as that!

The Karspitzbahn cable car will take you from Zell am Ziller right to the heart of the camera action. Now just follow the ski runs indicated here. They will lead you to the various photo points, ski movie segments and speed check segments. At the end of the day, not only Austria's longest downhill run awaits you, but also a photo album as a lasting souvenir!

## iZillertal Arena App

This app brings you the current weather forecasts, shows you which lifts and ski runs are open and lists the refreshment stops. It also shows you exactly where to find the nearest Wi-Fi hotspot.

## Legend

- Chairlift** The chairlifts on this tour take between 4 and 8 people.
- Ski run numbers** The ski run numbers help you to find your way around and the colour indicates the grade of difficulty. Blue: easy, Red: intermediate, Black: difficult.
- Mountain huts** On this circuit there are many opportunities to stop off for refreshments and get your strength back between all those meters of altitude.

## SKI MOVIE STRECKE

You've always wanted to see how you look on a parallel turn? Wherever you see this symbol on our ski run map, there will be a ski movie segment waiting to help you with your turns. Just have a film taken and enjoy it again at home.

## SPEED CHECK

One thing to remember: it's fun to ski fast, but don't forget the safety aspect! Having said this: this symbol marks runs on which your speed will be measured. An absolute must for all speed junkies!

## LÄNGSTE TALABFAHRT ÖSTERREICHS

When you get off the Krimml X-Press, first take a deep breath, then point your ski tips towards the valley, and away you go! If you take the ski runs numbered 22, 19, 11 and 10, you will be able to ski directly from the summit to the valley. This is an incredible 1,930 metres of altitude. Just count 1, 2, 3 and then preeeeep!
