

## **Ski- & Gletscherwelt Zillertal 3000**

Year-round guaranteed snow! Only one skiing area in all of Austria can tack this statement on its white territory - HINTERTUX GLACIER! Fun in the snow is guaranteed 365 days a year, and there is even a powder snow guarantee from October to May! Austria's only year-round skiing area is part of the largest skiing area in the Zillertal during the winter months - the Ski & Glacier World Zillertal 3000: 196 km of slopes covered in fresh powder snow featuring every level of difficulty, pristine deep powder snow slopes will make the heart of any winter sports enthusiast beat faster! There is a smooth transition from the challenging and varied holiday paradise at Eggalm to the sunny plateau at Rastkogel and further via the breath-taking panorama downhill or the 150-seat Tux aerial tramway to the "entertainment area" at Penken with the Vans Penken Park & Harakiri downhill run. Or you can decide in favour of the route via the snow-covered valley runs to Hintertux, Vorderlanersbach or Lanersbach. A downhill run of superlatives leads from the so-called "Gefrorenen Wand" ("Frozen Wall") at 3,250 metres above sea level to Hintertux (1,500 m). With a length of 12 km and an altitude difference of 1,750 metres, this downhill run will really provide a tingling sensation in the calves.
